For a completely healthy bodily function, both yoga and meditation are of great importance, practising yoga can improve physical as well as mental health of an individual whereas meditation provides peace of mind and control over the body. All of these activities have been shown to help increase the body's relaxation response and to reduce the production of adrenaline that leads to anxiety. Through meditation and yoga, we tend to control adrenaline level as well as the stressors that cause it and can contribute directly to anxiety, nervousness and the distracting mental chatter that can build up when we are stressed out. Thus any activity that can help combat these issues can also help improve your overall mental focus. Through the practice of yoga, you can become more aware of your emotional, mental and physical health.

Outcomes:

Practising the yoga, it will control the following things:

- Balanced Blood Pressure
- Decreased Absenteeism & Tardiness
