

National Assessment and Accreditation Council (NAAC)
Student Satisfaction Survey 2016 - 2017
Report on
Overall Institutional Performance

A. Please Confirm the first and only time you answer this survey

1,680 responses

B. Department

1,680 responses

C. Year of Study

1,680 responses

1. How much of the syllabus was covered in the class?

- 4 – 85 to 100%**
- 3 – 70 to 84%**
- 2 – 55 to 69%**
- 1 – 30 to 54%**
- 0 – Below 30%**

2. How well did the teachers prepare for the classes?

- 4 – Thoroughly**
- 3 – Satisfactorily**
- 2 – Poorly**

1 – Indifferently

0 – Won't teach at all

3. How well were the teachers able to communicate?

4 – Always effective

3 – Sometimes effective

2 – Just satisfactorily

1 – Generally ineffective

0 – Very poor communication

4. The teacher's approach to teaching can best be described as

4–Excellent

3 – Very good

2 – Good

1 –Fair

0–Poor

5. Fairness of the internal evaluation process by the teachers.

4 – Always fair

3 – Usually fair

2 – Sometimes unfair

1 – Usually unfair

0– Unfair

6. Was your performance in assignments discussed with you?

- 4 – Every time**
- 3 – Usually**
- 2 – Occasionally/Sometimes**
- 1 – Rarely**
- 0– Never**

7. The institute takes active interest in promoting internship, student exchange, field visit opportunities for students.

- 4 – Regularly**
- 3 – Often**
- 2 – Sometimes**
- 1 – Rarely**
- 0– Never**

8. The teaching and mentoring process in your institution facilitates you in cognitive, social and emotional growth.

4 – Significantly

3 – Very well

2 – Moderately

1 – Marginally

0– Not at all

9. The institution provides multiple opportunities to learn and grow.

4 – Strongly agree

3 – Agree

2 – Neutral

1 – Disagree

0– Strongly disagree

10. Teachers inform you about your expected competencies, course outcomes and programme outcomes.

- 4 – Every time**
- 3 – Usually**
- 2 – Occasionally/Sometimes**
- 1 – Rarely**
- 0 – Never**

11. Your mentor does a necessary follow-up with an assigned task to you.

- 4 – Every time**
- 3 – Usually**
- 2 – Occasionally/Sometimes**
- 1 – Rarely**
- 0 – I don't have a mentor**

12. The teachers illustrate the concepts through examples and applications.

- 4 – Every time**
- 3 – Usually**
- 2 – Occasionally/Sometimes**
- 1–Rarely**
- 0 –Never**

13. The teachers identify your strengths and encourage you with providing right level of challenges.

- 4 – Fully**
- 3 – Reasonably**
- 2 – Partially**
- 1 – Slightly**
- 0– Unable to**

14. Teachers are able to identify your weaknesses and help you to overcome them.

- 4 – Every time**
- 3 – Usually**
- 2 – Occasionally/Sometimes**
- 1 – Rarely**
- 0 – Never**

15. The institution makes effort to engage students in the monitoring, review and continuous quality improvement of the teaching learning process.

- 4 – Strongly agree**
- 3 – Agree**
- 2 – Neutral**
- 1 – Disagree**
- 0 – Strongly disagree**

16. The institute/ teachers use student centric methods, such as experiential learning, participative learning and problem solving methodologies for enhancing learning experiences.

- 4 – To a great extent**
- 3 –Moderate**
- 2 – Some what**
- 1 – Very little**
- 0 – Not at all**

16. The institute/ teachers use student centric methods, such as experiential learning, participative learning and problem solving methodologies for enhancing learning experiences.

1,680 responses

17. Teachers encourage you to participate in extracurricular activities.

4 – Strongly agree

3 – Agree

2 – Neutral

1 – Disagree

0 – Strongly disagree

18. Efforts are made by the institute/ teachers to inculcate soft skills, life skills and employability skills to make you ready for the world of work.

4 – To a great extent

3 –Moderate

2 – Some what

1 – Very little

0 – Not at all

19. What percentage of teachers use ICT tools such as LCD projector, Multimedia, etc. while teaching.

4 – Above 90%

3 – 70 – 89%

2 – 50 – 69%

1 – 30 – 49%

0 – Below 29%

20. The overall quality of teaching-learning process in your institute is very good.

4 – Strongly agree

3 – Agree

2 – Neutral

1 – Disagree

0 – Strongly disagree

20. The overall quality of teaching-learning process in your institute is very good.

1,680 responses

21. Give three observation/suggestions to improve the overall teaching-learning experience in your Institution 1,680 responses

Good

good

Nothing

Nothing

nothing

very

good

Good

Nil

Good teaching

Excellent smart

class

no comments!!

good faculty

learning environment

Very good

Excellent

-

GOOD

Teaching is good no

comments good

satisfied No

self learning

teachers allowed student in which they are interesting no

suggestions

can provide more video classes its ok

A bit of practical teaching is needed

Concepts can be thought via presentations and videos Wanted

more video lectures

Real time examples

I have improve my studies and skills it's

better

Can teach more practically

Teaching is overall good

None

it's better place to develop our knowledge everything is ok here Good.

give practical knowledge Interact

with students

Practical knowledge can be improved

Giving assignments in order to enhance our industrial skills

1. Still don't know the purpose of retest in unit exams, instead of having retest u can have assessment 2. very less interaction

between teacher and student. If student fails in any subject that doesn't mean his weakness, on that day he might have been poor

health or the circumstances may be different.

3. Anna University itself must change their exams scheduling based on single test. They must give certain amount of time like how

company's conduct exam via online.. the exam should be open portal..

Thank you

To smart class room and practicals Real

time example

Interactive to the students

Using LCD projector more

satisfactory

1) I think that the teachers should teach the students with more class and live examples 2) we would like the

teacher to teach us more things out of the box

NOTHING

needed coaching class at last 2 periods

conducting retest is just wasting time because students are not sincere in that wants to know

about many things apart from subject

excellent

No suggestions

want to be patience of student activities. to give

video class

to include more video sessions all

good

fair

improve the teaching level no

not bad

can have more ppt classes

More hands on session

More tests

At the whole am very much satisfied

They should teach the concepts in lcd projector Practical

Use good teachers

Teachers should teach practically not theoretically. Teachers should help students in what they wanted to learn Teachers should give support

Increase practical classes so that it can help understand the concepts strong. Technical learning through

laptop can be done

I want more real time examples in teaching

Placement training will be given earlier

Should be interactive. should teach with models. should tell practical application Everything is ok and very well satisfaction with the institution

All are comfortable for me... hope this continues for upcoming years too... Share some new technology information

Practical examples Smart

teaching

Regular interaction with students To

give examples about the topic.

Explain the concept with real time examples.

To improve the teaching using smart class.

The teaching is good even though we lack of the concepts so we need some application oriented examples & real

Time examples to improve ourselves.

Can do more video classes and with real time examples Interact more with students.

Require more of practical learning.

Can improve the class interaction

Very good coaching and extra classes are given.

Encouraging of students is better

For complicated problems, real time examples can be given more

2. To spend a time for 2 period a week to discuss about the growing technology and giving logical reasoning for

placement

Teachers are not preparing well before teaching. Only some do. So teachers also should work hard then we the student

community will improve our education better.

Please make more video classes for better understanding of new concepts.

Teachers must know that in what way student are interested and makes him/her to encourage in his/ her way that's my kind

request

PPT method for teaching should be more

1. To teach with more real life examples 2. to make

us more comfortable in subject

3. to tell more about the subject without syllabus PPT for

problematic papers.

They must arrange at least one industrial visit in a semester.

2. Teachers must teach topics as application oriented instead of just giving notes 3. Interaction

session must be conducted to improve soft skills

1. Comparison between students ,, ,, ,, the teacher said that he or she get good marks , why you can't ,, ,, 2. Give more priority to

students who are all studying well

3. If a dull student writes everything also the teacher does not give marks,, but if brilliant students make mistakes also the teacher

gives mark,,

1. Guest lectures can be conducted more often.

2. Hackathons can be conducted.

3. Other extra technical tools can be made available to students as a part of their daily classes.

Teachers should say the real time examples, not what was there in the book. 1. stress without environments should prevail

More video class Everything is

well and good

While teaching the teacher should say the real time examples and it should be beyond the syllabus Teach as students

understand the topic, don't need to teach continuously give some break, after lunch don't keep the theory subjects keep

problem subjects

More practical examples and practical industry related concepts should be taught Sports should be

encouraged

Sports should be encouraged

OTHER(1,248)

Sports should be encouraged

Must give some communication practice with everyone because still now some of them are not out of their circle

and not exposing themselves.

Teachers must learn the concept thoroughly and able to deliver in an effective manner and the teachers evaluate

the exam paper based on the presentation which should be avoided they need to check how the student had

delivered the taught content.

Can teach applications of the concepts by experimenting rather than theoretical methods.

Very good

Nil

Everything going good

*To explain every concepts with real world examples to easily understandable by everyone.

To present some video sessions with interactive session and also simultaneously to learn a new concept which

must be applicable or useful to our subjects.

To encourage the students of their own field of interest as much as possible.

Make use LCD or projectors and etc while teaching the classes

Should make students to involve in real time activities related to the subject we study..could make it more

interesting and lively with more suitable examples.

regular feedback from students

It is already good

Can be more interactive

Can be more interesting

Mentors should identify.. each students weakness and problem to encourage them.

Each and every course should be taken thoroughly and it must be understandable for every one.

Teacher have to teach the basics and further all clearly

1.It can be more like a digital learning.

2.rather than teaching subjects they should teach currently trending technologies.

3.professor's should be more friendly than now.

Already said like before teaching classes using projector makes learning more interactive

The learning method could be in a enhance way.

By improving facilities in lab

Can interact with the students more

Its already well now..there is no extra efforts needed for the improvement of teaching

-Need projector teaching

-Need special care on moderate scoring students

Very good

A bit of practical teaching is needed

Can help in doing more projects

Nothing

Nothing to say

Can try different type of teaching methodology where the students won't get bored of..

Give sufficient amt of break

Don't run behind portions

Teaching can be made according to situations n technology

And keep seminars , video class and lecture classes more

Give more effect, use TCT tools

Good

Effective lecture can be given by good interaction

Need more interactive guest lectures & workshops related to our course field, practicing to teach with by ict tools

and also by telling real time example related to the subjects

Explain with more examples..

Want more projector presentation classes

My institution's way of teaching is satisfactory to me

Can do better

Practical oriented learning..

Teaching with ICT tools can be encouraged.

Improving the software facilities in laboratory.

Concepts can be thought via presentations and videos

GOOD

To improve soft skills

To understand students mentality

To make their own choices

Encourage them

Need more effective guest lectures and workshops related to core subjects . Also practicing to teach with ict tools

like slides & video to the students.

Nothing required already good

Concepts can be thought via presentations and videos

Take the students to industrial visits often. Atleast 2 IVs per semester.

To understand students mentality

To make their own choices

Encourage them

Good

Book supplied doesn't help us in any cause

Not more than that

Real Time Application oriented classes and more interactive sessions.

It is good

No need such improvements

More lifetime examples should be added

Ppt sessions should be increased

Use more ICT tools to make learning interesting

Can explain briefly

Expecting this to be continued till end

use examples... illustrations while teaching concepts

Teaching is good

Good

Wanted more video lectures

Conduct some test

More practical classes would be better. Real time applications can be discussed.

Good

Wanted more video lectures

Teaching method should be changed.

Planning of learning should be advanced

To give live examples or use a projector to learn things in a better way

Can allow mobile

Allow to interact efficiently

Need more practical sessions

Everything is good.

Interactive teaching

At the whole am very much satisfied

Institution provide the facilities more it is good for all.

Good teaching.

Give more extra curricular activities to all.

Usage of electronic gadgets can be done.

Extra curricular activities must be encouraged to all students equally.

Teach effectively, encourage effectively

PPT for problematic papers

A bit of practical teaching is needed

Good, excellent, innovative

Can teach some more practically, that makes us to think out of box.

More video class can there

not more than that

Teaching with application will be more beneficial.

Usage of projectors should be increased.

Good teaching

More use of MultiMedia and projector

Everything is perfect

Wants more classes using projectors

Teach Practical with Theory

Good

1. please improve the way of teaching

2. focus more on real time concept which are related to our syllabus

3. please avoid unnecessary rules

4. please encourage and motivate students

Need Effective Application oriented lectures

Don't give stress to the students

Give real time examples while taking classes , Introducing more valuable value added courses ,
Encourage to

perform in extra curricular activities

More smart class needed

1. Better can teach practically. 2. Can give more and more notes. 3. Can give us a break in between
the class times.

1. Class Tests should be conducted frequently

2. A summary of the previous classes should be given at the start of the class by the teacher or 5
minutes should

be give for the students to refer what we have done in the previous class

3. Notes of a lesson should be given before starting a lesson and made to study before starting a
lesson and when

the teacher takes the subjects it would be more of an interactive session when we have an idea
about it.

I am very satisfied with the institution.

Great

Relate the concepts with practical knowledge

Always update the concepts and ideas

Always keep practise test

notes can be given respective subject. Concern Teacher can give attention in communication engineering.

1.focus on real time concepts based on the syllabus

2.ensure the best way of teaching

3.please encourage and motivate student both in academics and other activities

everything is good

Show animations and videos explaining the concept rather than by lectures.

Ppt class should be conducted

Notes should be given properly

Teacher should Give some time to go through

It's good

Every thing is good in our college

Should be with proper syllabus books

Good teaching

Not much strict enough

Teach little bit slowly

Give extra concepts for understanding

Good but need to have bit more interaction with the students.

Nothing to say!!...Just keep on going like this without any problems!! Teaching wise, caring wise no problem for

me... Having great experience with them!! Hoping this is to be continued till the last semester

😊 Thank you

.....

Staffs should be friendly to students. They should encourage us.

The instruments in the lab can be improved

Try to reach every student and ask for their doubts.

Have give more examples related to the subject

Give assignments

Conduct test

Can use projectors more effectively.

Can move more friendly with students.

Can be more interactive in class.

*Interactive and innovative sessions can be taken.

*Field visits can be improved.

Practical observations are very useful for learning

Complete the portions earlier

Extra information on the topic will be useful for us

Practical teaching should be improve

All the theory classes should be turned as labaratory classes/suitable notes should be given by the consent staff

members/information should be given to improve our skills regarding placement

Encourage active and practical learning. Make connections to real-world applications of the course material.

Provide for meaningful teacher-student interactions

The break period timing should be increased/canteen is very poor/Xerox notes is good than c.w

I like the faculties very much because they always encourage me and give all information which is very helpful

for me.I like this institution very much.

Leave the students in their own way so that they can learn many things they want.don't irritate the students to

bring their parents often to clg for some small reasons.change the syllabus include only those are useful to the

particulars dept.provide more IV and allow them for the other clg sympo etc.allow mobile phones for students and

allow them their freedom like boys girls talk(no problem).if a student finishes his/her exam allow them to leave

the hall.provide many function and occasion in their particular clg respectively.!

Encourage students base on their talents.

Make students free from their stress.

Make them to know about lastest technology.

Allow them to take phone .

Mere asking for fine or making them to wear formal dresses won't get students the mentality of an engineer

But providing the essential awareness and feeding them the engineer's mentality rather than pushing , does it ...

We have a lot of online classes , youtube videos , e-learning websites and much more for academics to teach us ...

All we need is a faculty who mentors the all round development of a student and turning them into responsible

citizens Otherwise the college is fine !

Can help students understand with real world scenario.

Usage of ICT tools can be more

Need better experienced teacher

Encourage the students based on there interest and passion.

Don't judge a student by his academic.

Allow students to participate in extra curricular activities.

We want video class for every subject

I have improve my studies and extra skills

Real time examples

I have improve my studies and skills

teaching method was good so nothing to say negative things

I have improve my studies and skills

Use more ict tools for teaching

n/a

Need more practical session

Discuss out of the box

Mingle with the students

Real time examples ,

Current trends with studies

More live teaching

Try to be free with students

Encourage extra curricular activities

Identify strengths of individuals and help them to focus on it

1. Teaching more than what is given by providing some real life examples.

2. self explanation kind of learning

Practical scenario based learning

Bring in more practical oriented learning

Teachers need some practical knowledge

To improve ICT tools in college

Should teach in easy way that a student can understand

The staff are so good in our institution. I want more applications based class. The staff highly interactive with

student

Use of ICT tools

Quality education needed

nothing

Teachers should be well versed in their subject, teachers should treat every student equally, student's voice must

be raised out.

Don't follow partiality, give some practical classes that's it

More real-time example

Exposing new technologies

Teachers can interact with students

Teachers can conduct more class tests so that we can be prepared before examination

No issues

-

Don't force the students for every situation

They can

Application oriented and real time examples to be inculcated for better understanding of concepts

Not to be only syllabus oriented

To provide extra information relating to the topic

Everything is good but we should emphasize on practical learning try to reach every student And ask for there

difficulties

They should want to communicate with the students

Make the students to follow the passion

Live examples... conceptual study...

Try to be friendly with students

Continue to encourage extra curricular activities

Nothing like that

We need more practical than theory

Practical teaching for the students in subjects

The overall learning process is good but there are few multimedia, LCD projectors...

1. Interact more with the students

2. teach in smart classes often

3. real life examples will make us easier to learn.

Concentrate not only on studying but also on learning

Real time examples

Most of the teachers are friendly and good, but some of my teachers are not so good .

But nothing can be said on the teaching way, they are good

1. They can teach through smart class.

2. Teaching the topic with real time examples.

3. They should give at least one day gap during internal exams.

Develop soft skills ,internship,workshop awareness among students .motivates the student to prepare for the

project in first Year.

Good teaching, Good guidance

Smartclass implementation, more practicals, projects

Use PPT while teaching

Could reduce tests and keep training often

Priority to students

They can interact sometimes

No such issues

Extra example need to understand concept clearly

Preparation, Explain Examples, Diagram

Ppt classes should be made available more for more practical understanding

Could be even more useful if all students were given training on how to do project during our course years.

Can do better

Nothing

Satisfactory

Good

classes demonstrating practical application of what we study can be improved

Teaching based on placements from starting

Explain with many examples and concepts

Industry's requirements are entirely different from the syllabus.. Actions could be taken to join the ends.

Allowance of company tech people to interact with student at the beginning of third year to share their

experiences.

2. Teachers must involve talented students in their PhD part so that students can earn experience in prior.

OK but there is no exposure

Very good teaching very well.

Teaching is very good in our institution

be with technology

good notes , good teacher , good collehe

Video classes

Industrial visit

To make more projects

Want to allow mobile phones

Interaction with the students, conduct quizzes

Would be better if we are provided more practical sessions

Awareness about recent advancements

Better knowledge to progress in our career path

They should allow students to participate in competitions without frequent permission .
students always used to

wait in front of hod room for two days for getting permission even for a smaller competition

Awesome teaching

Provide internship opportunities in core companies

Can make engineering more practical

Practical teaching

Teaching to improve skills but not mark as marks can be obtained by reading books.

Every teacher should guide their students to become an entrepreneur.

Teaching through the examples And practicals

Should motivate the students who have arrear. They keep on demotivating them. Not allowing
to join any

extracurricular activities or workshop,etc.,

I would like to select my teacher

1.Make teachers to learn what we learn they are not teaching us just come to class and blabber
something not

everyone but some people do that often.

2.Proper maintenance of laboratory with fully equipped tools should be mandatory, because of
lack of tools and

knowledge to Staff's complete knowledge is not delivered to students.

Syllabus should be updated, what we have learned is outdated 10 year's back.

Provide students their own space to interact and clear the doubts

To Promote library hours and to the should promote physical games.

.

improves infrastructure , creating extra talents of students

1.Good Facility for students to learn the concepts.

2.Excellent teaching faculty.

Very Good

nothing to tell

practical applications

advance technology

easy exolanations

good

no comments

1.Good Faculty

2.Good facility

good

don't concentrate more on marks

if the relationship between student and every teacher are good it will be more convenient and improve in our

progress.

teach with more examples

practical mode of teaching can be given

very good

1.Must allow mobile phones/laptops so students can improve their extra knowledge during their free time

2.should provide more practical approach

very good

need more internships,field visit opportunities.need more interaction with teachers and students.faculty should

encourage and friendly going with students.

no comments

it's better

1.provide more approach on practicals

2.allow mobiles

3.improve communication skills

reduce the strict level in campus

Need more video classes.

Need some more interactive sessions.

Wanted some workshops to be conducted.

1. Good faculty

encourage student

Need more video classes

Need some more interactive group discussion session

want to conduct some more workshops

very good

use projectors and practical classes

practical classes are required

very good teaching and learning experience but it can even be improved by providing practical classes .

give equal importance to practical

prepare before attending class

its better

it's better

Laptops can be allowed

good

weekly one or two period must be allowed for P.ED for student.

teach practically and more seminars, ppt class

practical knowledge can be given

Teachers can be friendly.

Class tests can be conducted often

More topics at a single class MUST BE AVOIDED.

1. talented teachers

2. maintaining discipline

3. good facility

extra care about students technical knowledge.

everything is okay

Can give more live examples for the concepts

Students friendly staffs

Sports interest

Give seats through sports cota

students at least one student a department

Want teaching illustration much more based on applications.

And provide more awareness about the existing opportunities for students to avail.

Change the rules

Should provide video session

The number of industrial visits can be improved

more digital classes / practical learning/ students can form groups and understand a concept and present it in their

perspective

Kindly treat the students with little kindness and lead a matured institution

Use smart class regularly

Very good

good

Can teach more practically

Good ..keep it up..

Interaction between students and teachers must be improved

Professionalism must be improved

More workshops can be conducted.

More of Practical learning can be helpful.

Teaching is very good

Satisfied about their helping mind and teaching skills.

No queries

Teachers are more friendly. Should develop students practical thinking.

Teaching level is good

Teaching level is good

My staff's are always good

Good

1.The chapters should be discussed with examples.

2.The practical session should be increased.

3.The practical session for programming should be increased.

More practical class should be available

Can be more interactive

Nothing

Due to pressure from management the teachers are focused on results and not in student's skill development

I wasted my four fucking year.

Good

Excellent

1.friendly communicate

Must have practical learning.

Mentor should be supportive.

Validation of paper should be done according to the key and based on Anna University.

College should focus on developing the communication skills of their students.

More practical classes can be taken.

More workshops can be conducted.

Classes should enhance the subjects to be interest.We need more extracurricular activities.And to gain more

informative things.

It can be made some more practical

Knowledge on real time applications should be provided

Can show more video classes

To teach more practically and explaining every concept with its applications

Need to be

Practical

Interactive

To be attached with students,more seminars,and encourage to participate

Giving a logical task everyday such as aptitude, quizzes, puzzles helps the learners to improve their logical

thinking and they won't get tired of learning...

Application oriented teaching is welcomed.

Video classes are required.

Company oriented training must be available.

Inter & intra-Departmental activities and events are appreciable.

Better notes

Good

LCD classes required

show more av classes

It's enough nothing needed to be improved

Practical experience

Exposure

Encouragement

Increase number of video classes

Teaching via smart class

Notes should be sent individually

Its Good

Maintain the same as follows for upcoming engineers.

Very good teaching

Doing more practical learning, Giving more projects

Make students gain knowledge through practical experiments.

The practical explanation should be given so that the concept would be easy to understand

Regular tests are conducted

Our performance are discussed

And appreciated

Good

The teaching should be not just to score marks but to gain actual knowledge

Judging students only by marks should be eradicated and the double standards of the faculty should be stopped

Well

Our teachers are enough to teach us to reach the subject

Good

Some practical experiments should be done to understand subjects and concepts

Everything is ok

Good startup to our career

To encourage and support lateral entry student

Nil

Nil

Need more practical bases teaching

1 Assignments given can be improved.

2 Current expectations can be discussed .

3 Opportunities in various domains can be made known to the students .

It could be better in all aspects

Can improve ict class

Practical learning should be improved

Good

In my point of teaching and the way of they give their explanations are so good .

Can teach more with application oriented

IV to companies

Relationship among students

smart class may improve the overall teaching

Teach with some example relevant to subject

Practical teaching, Industry personnel concepts

Need Digital teaching

Practical sections

Field visits

By taking practical clases

More video classes required

Need to teach more out of syllabus

Need to improve..

Teach with example relevant to subject

They can take class with interesting way

They can leave break sometime for each topic for refresh

Give time to relax

Give some more motivation

My suggestions for teachers is to be more interactive among students and gives basics introduction about the topic

has to taught

Try to solve with examples everytime

Practical demo is preferable one than theoretical one

Should understand student mentality and provide necessary advise to gain knowledge in any specific domain

No suggestions. Everything is great in our institute.

In smart class

Nothing

Nothing to say.

teaching is good

Maintain the same

1.Subjects can be shown in projector once in week.

2.Give preference to game or sport once in week.

3.Give awareness about competitive exams.

To improve the teaching methods

Make us to learn nd experiment projectors more and smartclass about our needs for our carrer

Good

Good

Technology improvement can be made by allowing mobile,other value added courses can be practised

Identify students' interests and promote them...some may like coding ,some like technical...both has to be

encouraged..

Only the students who know coding are encouraged.

Respect a student

It should be more practical

Good

Nothing needed! Our institution is best in all over

Nil

Want to teaching about how to survive

To teach our teaching staff's to improve our practicality of learning

To teach our staff's Please don't give us imposition .we are not a school kits

Good

I feel that if the institution allowed phone inside the campus then student can able to search and gain more

knowledge and then they can give out more output .

I was strongly disagreed on the institution rules that boys and girls no talk. We are not able to approach the girls

in our group discussion some boys are having more shy to talk with girls so if you allowed it then the would feel

comfortable in their jobs.

Other then this i feel that there is a lot of difference between sec and sit. But you are saying that we are not

differentiate sec and sit and teaching level was excellent in sec comparing to sit please provide more facility for sit

students also.

Need some improvement

Teach the concepts practically

To have more video classes

Improve the program language for all the department compulsory for IT and CSE student

Conducting Hands on session

Guest lectures

Smart class platform

Hands on session must be improved to the current technology .

The mentor should have special sessions with their mentees and help them to identify thier strengths and

weeknesses, altogether they should live upto the defination of mentor.

Teachers should make their approach of imparting knowledge to their students in an interactive and much more

understandable methods, they should understand that spreading knowledge is not just limited to placements and 6

lac and above CTC. Knowledge is a life long gift and so should be the lifeline of the concepts learned in the

college.

College education is not just limited to attending classes and putting up the attendance, life long lessons are

those which are learnt outside the classrooms. The teachers (No matter whether they are the mentors of their

respected students or not) should encourage each and every student to actively participate in extra-curricular

activities such as:-

Sports

Communication enhancing activities

Frequent workshops and seminars

NOTE :- THE FEEDBACK AND RESPONSES DELIVERED ARE ON THE BASES OF PAST 1, 2 and ongoing 3 Sem as on 29/07/19.

No suggestions..it's perfect..it's just our responsibility to carry on

Conducting hands on session

Conducting guest lectures

Smart class learning platform

It is enough for me

Teaching is overall good

Much more live example with easy understanding can be given

Increase video classes

Teaching is overall good

Discussion with previous year question papers every month is suggested

Everyday revision before new chapters will give a better glance on the portions

Exams with required leave in the middle can help us to study better with less pressure

Nothing .

Good

Everything is good

None

Video based classes want to be promoted

THEY ARE GOOD IN TEACHING

Teaching is good

Teach us slowly, be motivative and give us instructions regarding technology

It is satisfactory

Good experience

use more practical teaching

decrease the tests

More practical knowledge

Explanation need more

they should give importance for average students

They should give marks fairly for every student

Good

There can be something done to improve our practical knowledge even more.

Good

Suggest to provide Smart learning Environment

Need more eggs for the topic

The teachers should look into all the students about their talents

Teaching at the best

Efforts by the institution is good

Campus is Nice

Nothing

To improve the quality of teaching and to encourage the students who can't study

Good keep going

No Comments

Extra informations.

All perfect

No need improvement

Good

Nil

Explain with examples

it's better place to develop our knowledge every thing is ok here

it's better place to develop our knowledge every thing is ok here

Good and excellent

Example based teaching.

Can be more digitalized with more examples

No interaction between boys and girls

No college tour

No phone allowed

These things should be allowed

1)Smart classes can be implemented.

2)Teaching can be made more practical.

don't force the students to run behind the marks. over strictness make the student feel stressfull. so Please give

freedom to them. thank you.

explain concept with more examples

Visual examples can be given to us more

Video class.

With reality example

By giving good training using LCD projectors multimedia

No need suggestions

Want to improve practicality methods of teaching

Improve creativity of students instead degrading him/her

Smart class , innovation in teaching, practical teaching

Giving Notes

Make the class Attractive while teaching

Use of ICT tools should be made frequently

Must encourage to indulge in activities other than studies

Equality should be mounted among students

Sry no comments, we got prepared by good faculties

Very excellwnt staff members with depth in their subjext knowledge...

Application oriented teaching is required

Good teachers and very good guidance from the department

More LCD projectors can be used

The guidelines given by the staffs are to the great extent.

I request them to include more presentation class than theory class period.

Talk to students and try to understand them

To teach from multi media

Practical explanation may help us to learn many things and its application.

Good

Teaching can be done professionally like using projectors

Good

Excellent

Excellent

Excellent

no improvement needed everythng is good and satisfactory

Friendly conversation

Activities

Games

giving space to the students

not shying on them like a accquest

Usage of LCD displays.

Involvement in programming course.

Encouraging for workshops,internships etc.

keep it up

Best place to learn and grow

Good.

1.Usage of LCD projectors for the improvement of conceptual learning.

2.Asking the students to take seminar on simple topics.

Nothing

Need to be more interactive with students

Projectors are placed in each and every classes.but they are not used to it.

industrial visit should be taken often to enculcate more ideas n us.

Engage with students, teach new topics,keep updating about environment

Good

Give even more informative &initiative cls for all range of students.

Nothing ekse

Communication can be improved

Good

Don't give assignments

Don't dominate us when we failed in our exams

Support us

Teachers can interact with students to improve the students activities in subjects

Good learning experience

good

Give a video lecture about subjects

Give some activity to make it learn easily

Try to reach every student and ask for their doubts.

Use technology to teach effeciently by giving more examples through it

Encourage active and practical learning.

1.technical learning

2.practical education

3.use less amount of paper

Practical class should be given . interaction should be made towards subject

Good

To teach practically with ppt

Good

To teach practically with ppt ..

Worst indeed !

Teachers need to improve their way of representing the content to students.

Other than this everything is good.

Needs to have more industrial visits to have a better practical knowledge especially in our department

It was satisfying to me

They can add some industrial visit for the students benefit.

Can give more seminars for the students in syllabus to improve their communication and learning skill.

To make some motivating guest lectures in future.

To give us a practical experience

Good teaching no improvement needed. Need some leisure time.

Institution can make us to gain better practical knowledge in our subject.

Need to take care of the each student

Placement and coaching

Can teach more practically

It is better though !

The teaching is good.

The learning experience can be good if extra effort was taken by institution promoting the multimedia usage for

better way of understanding concepts!

ADC concepts should be explained in much better way.

Maths teaching is good but some voice modulation required. Less voice leads us to sleep so.. Loud voice required.

Nothing required

Teaching is very good in my institution, there is no need in improving anything.

i am just studying second year, I am just started to experience learning, Till now its very nice.

1. Need to improve communication skills
2. Need to provide practical knowledge
3. Must provide everyone to participate in extra curricular activities

1) Use better graphics and visual media to engage students well

2) Try to reach every student and ask for their doubts

Discussion about new update in technology

Everything is fine

more video classes

More real Time application can be shown

Giving More Practical Explanations and Real Time Problems and their solutions while Teaching.

Informing the More Industrial and Real World situations about the subject to the Students.

1. More time for practising & Combine Learning

2. Special time must be given for placement preparation in college

Stressing Students Should be Avoided as it can affect their Health

Use LCD projector more for teaching, pointing the strength and weakness of the students should be more efficient

and teachers should encourage the students for extra curricular activities so that the students can improve their

own talent in them.

please understand the students situations

Encouraging extra curricular activities

All the teaching methods carried out by my institutions is well good.

All I want to say is not to stress students on the completion of observations and records coz it feels completely a

waste of time, either record or observation can be done but now both of them..I hope u can understand!

Portions can be thought little slowly

Inceptive approach towards learning is required.

Information about competitive exams must be shared by faculties

Importance to extracurricular and Co curricular activities should be improved little better.

By taking practical classes

Practical learning,

Industrial visits.

Good

Good

Everything is good

should use led projector and multimedia while learning or teaching.

The overall teaching is good

Improve practical section

Practical oriented must be implemented

Various examples must be taken for making us understand the concepts

3.projector teaching May be used

good

To teachby application oriented

Practical teaching is required to improve our skills

Cover all syllabus

Conduct class test

Good..

Concentrate to average and poor learning students,avoid partiality by paying more attention to top students ,help

average students by finding their strength and kind towards them

Can use visual teaching technique

Don't be partiality with students

Can use the multimedia facilities to enhance learning.can extend the time to be in library
teach with the practical knowledge of the subject.

Good

motivation,need more practical knowledge

Teachers must focus on teaching the concepts with real time examples rather than book examples.

They must explain the concepts correlating with modern advancements in technology.

They must show many videos related to each & every concept in classes.

Must make use of projectors more than the board teaching.

try to teach more practically ,avoid corniring students ,encourage extra circuilar activities

1.Some teachers should develop teaching skills

2.encourage each and every student for their betterment

3. Give repeated practice in syllabus

Good interaction

teachers should move in friendly way to students

students should not be given opportunities based on their academics

exposure to the external world should be promoted

students pressure for the academics should be relieved

Maintain the same as always

May teach with additional applications and examples for easy understanding.

1. use of powerpoints during classes

2. conducting industrial visits regularly

nothing to say

good satisfactory

good

need to improve visual learning

slightly ok

teaching process is good, teachers illustrate the concept with examples

The teachers should form a friend zone in a class with the students

To give more practical experience

Encourage students to involve in various activities

projector class and industrial visits

Should concentrate more on knowledge development of the students and practical experience

yes

More workshops should be conducted

Cope up with current technologies

monitoring the students

provide more industrial visits

need more guest lectures

give practical knowledge

give practical knowledge

1. Students can be given an opportunity to choose their teachers.

2.giving more practical experience would do good.

3.giving field experience to students can make learning more effective.

Interact with students

Students friendly

prctical oriented teaching

friendly apporach,encouraging students in extra curricular activities

Give teaching through LCD projector

Give equal opportunities to each and every student

Involve the students to participate in sports

Good

good

promoting peer-to-peer classroom visits with time for feedback,Strengthen peer-to-peer instruction,Promote and

nurture effective and active teacher learning communities.

give pratical examples

Use technology to see others in action,Positive. Keep your students engaged with a positive attitude,Active. Keep

your students thinking.

good

Prepared, You should know the course material.Organized,Have a plan for what you want to teach.Clear,Effective

teachers can explain complex ideas in simple ways.

satisfied

Good environment

More usage of multimedia while teaching

And visiting of Industries should be available at least once every month or semester.

Engage students.

practical knowledge than theoretical knowledge

more industrial visit

seminars based on real time applications

good well teach

need more practical knowledge than technical knowledge for all students and also encourage students in

extracurricular activities and sports they are allowing only students who get only pass marks this is unfair.

I have learnt a lot of this from this college

Friendly environment

Motivational talks

practical knowledge implementation

need of teaching with more examples

Can be more practical

More importance to hands-on-training.

More industrial exposure

Upgrade the curriculum to reflect current market technologies.

Industrial visits can be made relevant to subjects

More Laboratory facilities can be done.

Practical knowledge can be improved

A little bit learnt

Improve monitor classes

Avoid re-retest

Concentrate more on providing core knowledge to the students

Practical knowledge can be improved

Yaa.regularly

No one else

Change test method

Change Book provided

More technical and practical knowledge of concepts.

practical sessions can be conducted often,extra courses can be offered

practical understanding of subject concepts are required

Use Projectors

Teach with more examples and application

to show more video section and encourage to visit for industrial visit

conduct test,change the way of teaching,interact with student.

To give more practical session

professors can teach the syllabus in english and communicate mostly in english so as to inculcate the

communication among the students.

teaching methodology

communication

need practical class

more example

Interact with students

Teaching with the help of projectors using online resources in class can be implemented for the improvement of

knowledge and updates in industry.

want to workout more problems in class,exams.

teaching in smart classes can be enhanced to make it in a better way.

best college to get pass marks and to get more knowledge

encourage practical learning

take the students to worthy industrial visit regularly

communication instruments shall be allowed

encouraging in practical learning is required

teaching students the need and the applications of what is learnt is necessary

the teaching should be improved by showing examples such as lcd and projector view and the industrial visit in

our college is very poor.

providing visual classes,teach apart from syllabus,industrial experience

intreraction to studnts

machine learning,practical sessions

Needs Much interaction

use the projector to take classes ,it is never use before

good

#my think is teacher give more attention to the student

#extra curricular activities not there(if there means arrears student not allowed to attend this program or any

games)...

#there is no smart class in class room ...

more video classes

value added course

nothing

Teach it in a practical way

Teaching through smart classes can be enhance to make teaching in a better way with a lot of interactions.

want to workout more university problems in class.

industrial visit should be increased and should be worthy

Learning with projector may be increased for enhanced experience in class.

Industrial visits can be increased for visual experience in industry.

Online study materials and resources can be increased.

#my thought is to increase care of student and improve facilities of college..

1.ore practical knowledge to the student should be provided.

2.quality of education should be improved

3.education through ICT tools is neccessary

practical learning should be encouraged

smartboard usage,more practical rather than theoritical

teaching through ppt

practical classes should be given more importance,taking classes with modern tools,weekly one guest lectures

teaching through ppt

teaching with models,explaining withreal time examples,motivating us by knowing our skills.

good

expected more practical way of teaching

extend more events

lab facilites

need ppt classes

to give practical exposure and examples based learning

Practical teaching methodology must be inculcated.

Application oriented teaching.

Teaching level should be upto the industrial expectation.

Need some video classes, practicals

need more practical examples,

need better communication with each and every student,

special encouragement to all students.

exams, application oriented, projector class

exams , video class

practical classes can be improved

satisfied

teaching should be practical

mode of teaching is good.

The Teaching should be Practical and explained to the student via smart class. which could make the student to be

more attentive in the topic.

overall its better

allow mobile phones to college. 2. free the students to learn on their own 3. dont restrict the weak students to

participate in the extra curricular activities

Should encourage some extra curricular activities and technical field activities.

21

Give practical knowledge and individual teaching and the students are scared to the teacher so please rectify .

1.theory classes can be thought with practical knowledge.

frttf

needed more explanations

way of communication should my easy

should give sums

To maintain the existing system

good

good

good

good

Encourage self learning

Use more video classes

More guest lectures

Now it's good try to follow these in future generation

Video classes may improve practical knowledge ..

Need video classes

Good communication and caring

Need to learn through smart class

And help students to over come their difficulties in subjects which is tough

Improve the way of teaching

The number of industrial visits can be improved

Super and very excellent

Good

Want to teach experimentally to understand easily

No suggestions about teaching

Can be even more effective in all

It is very useful for the students . they give more opportunities to us.good teaching methods

Teaching very well this will be continue

The pressure given to the students should be reduced. Students can't handle all the works given to them as it is

more than normal. Please consider students stress level.

Institution provides all the facilities nothing to be mentioned

Excellent

Need to treat them as a professional not like a kid

To teach more practical

They can give practical knowledge not only in labs as well as in class room.

They can stress more on using ict tools

They can allow us to participate in many extra curricular activities

They could kindly promote the use of mobiles at least for some extend

Nil

To make parctical examples

Be friendly with students,Don't force the students.

great interactive best

It should not be bored

Concentration more on practical will make students to learn easily

Use better graphics and visual media to engage students well. ...

Try to reach every student and ask for their doubts

Make teaching a two way interaction.

Caring the students in right manner and they boost up us to ignore \avoid the shy and stage fear

Conduct class test more,condut seminars in the class room,says our week nee to as don't call our parents please

change this procedure because some parents are discraging as ,thankyou

By using projectors and multimedia

Keeping class tests in right order weekly 3 times

Keeping weekly test

Using projectors

More LCD projector teaching

Improve in practicals

Good

Giving assignments inorder to enhance our industrial skills

The institution has already taken necessary steps so there is no need of improvement

1.classes must taken in practical way...so only we can understand the topic clearly..

Good

Allow mobiles for better learning

Satisfied

They can give us practical knowledge

They can show some videos related to subject oriented .

Give Assignment, Regular test, practical experiment more

All faculties are very experienced and knowledgeable persons all are help to improve our knowledge

All is well

They need to use some technology this. College is like 80's no technical equipments are good.

They need to allow phones to improve our education.

Test can be reduce

Teaching should be done with practical examples.

Everything going well

Can do it practically

1)To contact class committee meeting 2)To take special friendly care other than academic work
3)Let allow us to

part in extra-curricular activities irrespective of academic position

Teachers are teaching really well so I feel that there is nothing to improve.

They shouldn't treat us like a child,practical teaching must be appreciated

In Derivation topic ,they should have to prepare logically and teach easily understandable to students

Getting the students to go for the any internship and iv

Already good .there no suggestion to improve the teaching. The teachers use the projector while teaching is great

that only the improvement. The students also like that type of learning method

Nice and clear teaching

It will be helpful if there are some industrial visits

Phone shall be allowed

Should expose more practically.

Improve teaching method.

Aaaa

Good and Treat all the Student as same..

We need hands on training apart from regular activities.

to give us more practical knowledge

Good

Teacher must encourage student

Good

Practical works should be given for the students

Should use the smart boards

Should make the classes more interesting

The teachers should watch the students and should not discourage them they should motivate them

1.Can improve video classes

2.More industrial visits can be given

Overall good no suggestion

Good.

Parctical examples should be

More examples can be given for better understanding.

Club activities can be more effective .

But, good encouragement is given by the mentors to develop skills in each situation.

Nothing

Everything thing is good so no need to say anything

No

Good

Good

Real application example of the topic will explain for afterwards

To give equal time in sports

Instead of studying the theories,..it is better to change into practical...

Use practical approach

encourage extra curricular activities

Teachers can have a laptop n smart classrooms are expected.

Students can be allowed to bring mobile phones to the campus

Student-teacher relationship can be improved

Asking question in the middle of the lecture and regular class test should be conducted

Need more video classes

Staff should prepare a hint on the topic they are going to teach that day .

Necessary example should be given in order to make students easy to understand.

Using of available technology like ppt

Presentation and videos help us easy to understand.

Good

I my point we are getting lots of knowledge and experience through their teaching .No need for improvement

Practical learning must be emphasized

Very good coaching.

Effective analysis of student both in academics and co-curricular activities.

Makes student easy to understand through video classes.

Give some hands on training and workshops related to our syllabus.It improves our learning.

Good

1.Still don't know the purpose of retest in unit exams,instead of having retest u can have assessment

2.very less interaction between teacher and student.If student fails in any subject that doesn't mean his

weakness,on that day he might have been poor health or the circumstances may be different.

Anna University itself must change their exam scheduling based on single test.They must given certain amount

of time like how company's conduct exam via online..the exam should be open portal..

Thank you

More practical classes needed, syllabus should be changed

Excellent

Very effective training is given

Can give more lab facilities

Good by now itself

Good and well

More practical learning

Iv

More exposure

...

Intract with students

Should teach practically

Assesment test must be conducted

Real time examples

little more to be done

Nothing

Nothing in particular. Everything is so far good

1. Rules liberation

Interact with students more about their studies progress and give real-time views and xamples

Some faculties need to improve their self according to the syllabus changes.

Can ask students to do seminars

Can give much more assignments

Good teaching

Encouraging all the students is very important. Motivating the particular student makes other to feel

unsatisfactory.

the institution was a great one.

so no suggestion can be given

Teach happily, don't punish, motivate always

Take to Industrial Visits

Innovative teaching

This 2 days are awesome and we enjoyed it and learn something new in Two days

1. Want more Industrial Visits

2. Reduce The rules formulated by the institution

3. Reduce giving assignment works

Need to put more videos related to subject and explain practically with some examples

Need to give more impotance on technical knowledge

no anything particular but should improve in all aspects

The education provided in our institution is really good and quality

1.usage of projectors

2.teaching in interesting way

3.extracurricular activities are very less.

1.video classes required

2.more Industrial visit required

3.motivating students required

Can give good notes to study

Very good

Improve the standard of teaching practically

Nothing

Good teaching

A good quality education is given by our Institution.

Maintain same

Can increase the usage of ICT tools for teaching

Dumping up of things at a time can be reduced

They must teach using video classes

Need practical knowledge

Can give proper textbooks which we need . Can give proper notes for some subjects.

Do the same

no need

It was good

Everything is going well no need for any improvement

The quality is always good and teaching is effective

Methodologies were good

Teaching is good and easy to learn.

To smart class room and practicals

Good

Importance in sports must be given

To smart class room and practicals

More practical experience

Everything is good and wanted to continue the same

Teachers should share more information with us beyond syllabus

explain elaborately with examples

Explain elaborately with example

Teaching is good

Should prepare well

Let us know things other than things related to subjects

Can conduct class tests

the practical teaching must made

The institution can provide even more multiple opportunities

Nothing

Teachers should be well versed in the subjects they are teaching, with thorough understanding of the concepts

involved.

More emphasis should be given towards learning things apart from the syllabus.

Teaching should be done so that students understand the concepts, and not to just make them score marks.

Very thing is good but more valid added courses need to contact

Give more assignment regarding the topics

Don't stress the students mentally

Give opportunities to everyone

Can be interactive

Nothing

Power point lectures

Nothing

Suggests friendly teaching style

Practical engineering applications as examples are encouraged

Good

More application based teaching

Need interactive sessions and more effective video classes

Can improve their teaching style using PPT

Tools are not used while teaching

Can interact with us more about the topic before teaching

more realistic examples can be provided.

The way the teachers teach can be made interesting and interactive a little bit..

No imposition because imposition makes us to hate the subject

Teaching can be made experimentally.....need lot of practical training

Not in my consun

Good

All are good till now

Everything good

Good

Require smart class teaching

Want PDF related to studies

And perspective teaching skills are required

Young teaching staff can easily go with students ,

Teach all units as much as possible.

Excellent

Overall good

All the students of a class have to take seminar in a topic of any one subject

Teachers may support extracurricular activities of students..

Nothing

Very good

No comments...

Already good. Nothing to be done.

Professors ensure each and every concept is understood by students in a simple way as possible

Technical support in teaching is more easier way to move forward in syllabus

It is hard to say but , professors should also trust students sometimes in Oder to provide a good education

Need some practical example

Some extra guest lectures and video sessions shall be conducted.

Learn to be more patient with students and update their knowledge and not demoralise the students

1. Use projectors in classroom.

2. Encourage active and practical learning.

1. Even more Video classes

2. interaction with students eg: seminars

3. update technical information

More video classes

More seminar classes

Can do well more better

Good

Practical session need to get good

And practical exam should be conducted for each month according to the lab class

Practical method of teaching, create live projects, learn the latest technologies

Good

It's good overall

Give applications

Good

More than enough.

Need much clearance in teaching not for all staffs but for some staffs please tell them to avoid keeping arrears

coaching in Saturday 😊 thank you.

Good teaching

practical teaching needed

Should give importance for sports for girls

None

Good

Try to encourage students to do extra curricular activities, no need of compulsory improvement tests after passing

the exams

Overall it was good

Nothing

Explain Elaborate with example

Giving some homework

I think it is ok to teach . It's enough

It was very good...the institution make the students to the high level.

Usage of lcd projectors

Ambiance in lab must be made good

Systems are in worse condition

Institution must provide importance for practical works to improve more knowledge

Good

Nothing to improve because everything is perfect

Can be more interesting

Good teaching

Staffs should be more friendly with students.

Good

Can improve

Have to give importance for things which really matters for students future

Nothing

Our over all teaching and learning experience is very good

Need to prepare more

Give notes , take more video classes

nothing

nothing

To be more clear about the topic and to clearly explain the topic with prior preparations

More videos and PowerPoint classes for better understanding.

Practical teaching

Excellent

Listening in class is the only way

Teaching is good so prolong the same till the end of degree

Industrial visits and want practical sessions

Awesome

Good

Digitalised learning must be implemented for fast learning of all the concepts. Practical learning can be

encouraged rather than theoretical approach.

Teach more practically than theoretically

Skills required to work on different environments should be focused.

Modern day tools and most spoken technologies must be explained often to the students.

Please continue the same method of teaching

Class sessions can be taken as practically in order to take in a theoretical manner

Teaching and learning experience are good in our institution.

Help to improve our extra curricular activities.

And also help to creating project knowledge.

Good teaching

Teaching can be more technical and application based.

this standard is enough for us

Maintaining an interaction session.

Providing an ease way of accessing staff's knowledge about the subject.

Teaching is good to learn.

Teaching can be more practical

study materials can be given as required, that is understandable by students

Hands on experience is required

Conducting technical skill contests regularly

Extra curricular activities can be concentrated

More interactive with all students

Better teachers

Better examples

Practical knowledge

Include interactive session more

1. Encourage the students 2. week end conduct one important subject test 3. conduct mid term test is necessary it

helps to good marks in model test

Use more practical examples

Go slow

Give one to one attention

There is no improve in the teaching

Nothing

Can be bit slow while teaching Data structures in C

Can increase the use of internet.

3 .Can effectively make use of smart classes

Good teaching

Can concentrate more in showing video classes regarding subjects and relevant topics.

Good

Teachers must have a little more attention towards their students' academic.

Teachers may inform, while they know, any upcoming events such as symposium and workshop that are being

conducted in other colleges and encourage us to participate in that.

First response to student needs, don't judge student according to their score in academics and your views, inculcate a

friendly teacher-student relationship, it is disgusting that marking of student is incapable or insufficient by your

filth understanding, at least be a teacher for students and not puppets of the institution

Nothing to say they are always good in their way

Not only focus on academic give free to students to concentrate on extra curricular activities also.

Nothing

please make the students to collaborate with industrial persons

make them aware of communities such as IEEE, Sae, etc

give more time for practical implementation

Use projectors for teaching, explain with field experience, excellent teaching staff

In our college good teaching faculties and good institutions provided for me

Practical experience can be improved

I request Professors to understand the generation gap, don't expect likes yours generation and don't move that

way ...by following this communication between students and professors can be improved and problems can be

easily solvable

make them interest in learning by interacting with them

Provide us more internship opportunities and more exposure to coding related activities

class should be practically conducted.

regular assesment test

seminar class by students

Good teaching

Excellent communication purposes

Improve the performance

Good

1. Give more practical examples.

2. Allow students for extra curricular and co-curricular activities frequently.

Making classes more Practical

.

Not much

Can give more practical examples.

Nothing

Teaching can be made more friendly.

Practical applications can be used for better understanding.

practical teaching is required

Teach beyond the syllabus

Have a clear knowledge about subject

Correlate the topics with real time example

To make more presentation during class

Good

Good

Assign Practicals more often

Instead of symposium make workshops

Motivate in out of box syllabus

time is not sufficient

Extra lab session is needed for effective learning

It is already good

Nothing

1. More industrial visit opportunities can be provided

No. Of Guest Lectures can be increased

Every student in the class can be encouraged into taking seminars.

Apart from syllabus we need more lessons

Can have a little more practical sessions

teaching should be made via entertainment

Everything is good and fine

self learning

reduce no of tests and assessments and try to give practical project works more..

Stop focusing on marks and focus on understanding on the subject..

Dont waste time and paper and keep the internal marks completely on project work which you have to keep on

every semester from the beginning.

self learning

Interactive

do the best

More ppts would help in better understanding of concepts

Practical applications can be used.

Field visit

Extra curricular activities

good

good

Real time example is necessary.

Need more practical knowledge.

it will be better if they interact with every student.

It will be better if they interact with every student.

work hard

It will be better if they interact with every student

clean restroom facility is needed, clean classroom is needed, good AC is needed in IT labs

Its very difficult

1.Can be more technical and practical

2.Laboratory session can be more effectively used.

3.Instead of following single notes, its better to provide more and more notes.

Teaching is good

Encouraging the students is not enough.plz monitor them and guide them to their aim .i had seen that some

students only get helps and stufs from dept to move in outside world techwise. Encouraging more students with

their potential my encourag them to move forward.

self learning

1.The Concepts Must be cleared in Partical Oriented Techniques

2.Other than Academic...

The instituion Must improve Sports.....

All Sports equipments are here but does not allow to Participate in most of the Competitions....

3.College Life is awesome...

After Completing my Degree....

I can Realize that it's a best part in college life..

Allow the Boys & Girls to interact with each other...

In the real Competative world

All Must Face the Problems...

We are Trouble in Company to interact & Mingle with Girls...

The management should provide dedicated time for extra courses other than the syllabus

Identify each and every students

Good

Real time example

Interactive to the students

Using LCD projector more

Real time example

Interactive to the students

Using LCD projector more

Good

Best always

Involve the class more

Good

Nothing

Giving notes with real time examples is better to understand.

1. Monitoring Individual Students according to their performance levels

2. Informing students about the scopes and new technologies

3 Taking Industrial visits for real - life demos

No suggestions

Discuss more example

Relate to real world examples

More ppts

most of the Facilities are friendly and share there knowledge to students and encourage in person skills and

study's

1. improve standard of education 2. give more importance to practical

3. technical skill to be motivated

Knowledge persons should be there in a way they could explain real world examples to us.

Energetic vibes should be there to makes students in a class active and interestic

Field oriented task and competition should be conducted to find out the outgoing students and make them as a

guide to encourage their friends too to achieve it.

be free to every one

be moderate

be like a friend

Excellent

No

Yo take full syllabus with effecient teaching staffs.

No suggestions just follow what they are teaching and concentrate in unit tests

-

Can use more practical classes

NIL

Follow up the students n grow up there mind set. Move with friendly to understand students then improve they

talent

Nothing all good

No

Practical knowledge should be improved

Could be better if the syllabus are covered by using real time examples

Most satisfied with all the activities done by my Institution

Good

Need improvement

Could be more practical

Interact with the students

Include more video sessions

Provide materials

Give more video classes

Please make sure every information is passed to each and every student

A better WiFi connectivity

Improved reference books collection

Better

Good

No need for improvement

More case studies

More IV

Guest lectures not sufficient

Good no improvement required

No suggestion everything is good

practical teaching must be initiated for better understanding

already our teachers teaching very well. we never want any improvement

the teaching was good but we need some extra information to study

To use LCD and allow students to explore more.

To teach in ENGLISH.

Overall my institutions is good.

need more interaction with students

to have more practical in teaching

PROFESSORS NEED TO TEACH THE THEORETICAL CONCEPT ALONG WITH REAL LIFE

APPLICATIONS

PROFESSOR SHOULD UNDERSTAND THE LISTENING CAPACITY OF EVERY STUDENT AND

SHOULD TRY TO CHANGE THEIR TEACHING METHODOLOGY IN COMPLIANCE WITH THE

LISTENING CAPACITY OF EVERY STUDENT

WORKSHOP TO BE CONDUCTED REGULARLY IN ORDER TO UPDATE US ACCORDING TO

INDUSTRIAL STANDARDS.

FINALLY A FRIENDLY AND RESPECTFUL COOPERATION AMONG PROFESSORS AND STUDENTS

WILL IMPROVE THE OVERALL TEACHING-LEARNING EXPERIENCE AND PERFORMANCE AS

WELL.

ENCOURAGEMENT IS NEEDED MORE .IF ANY MISBEHAVE OF STUDENTS INFORM TO

STUDENTS SEPARATELY .

littel bit slow

need to encourage not to demotivate

teaches should deal with student not to parents

DEAL ANYTHING ALWAYS WITH STUDENTS.

Give enough freedom to approach faculties, encourage their ideas and thoughts.

Smart classes should be frequently arranged for theory subjects

More Classes to be taken via Smart class or projectors.

Teaching process can be giving practical, way of teaching is application oriented & the teachers can be arranged

Industrial visit for to learn practical

We need proper industrial visit

Having more of practical based classes

Making more of video classes

More interacting with students

Teach practically

Oral questioning can be conducted

More examples can be given practically

More projects can be given

Give importance to laboratory than theory papers, make teaching interesting, the examination question paper

should always contain new questions which is not asked.

Kindly explain in simple English.

More video class is need

Be the best and remains the best...

Should improve the understanding ability of students by teaching with video classes and teach the advancements

of technology by special classes

The institute have made all sufficient improvement and some more IV can be conducted regarding the study field

Teaching with more LCD projectors &

With more live example &

Solving more problems for problematic papers

Explain important engineering concepts through ppt and videos.

Improve time management skills to complete the syllabus on time.

It will be good enough if it was illustrated practically

take all the topics in different manner. always update our knowledge. give good guidance for the future...

Good

Good

Just some motivation and time to learn

Continue the same way they teaching

The best teacher.... Should reduces the strictness level of eee faculty

Can provide PPT and some realistic videos of the topic

The instution should allow students to participate in games

Motivate students to face challenges both in academic and extracurricular activities and also in their real life

situation.

Giving assignments inorder to enhance our industrial skills

It is very useful to us so The Institution please keep it up like this

They done the job well

Need projecter class

Need to encourage extra curricular activities

More interaction with all students

they can improve there coordinator ion with students and hod coordination is very worst

improve pratical learning

Not allowing us to use network

All the staffs should understand the student situation while the class is going long

They can improve teaching by smart classes.

Teaching by application method

Make students understand

nothing much.

1. Teachers need to use LCD projectors with practical examples such as application oriented of the topic.

Field visit experience needed to be given for students.

Teachers need to complete syllabus well before on time and give time for preparation.

Continuous test and

exams won't improve us in anyway. There needs to be some gap, atleast a day between exams for preparation for

unit test and model exam. There will be effective changes in results if they consider this feedback.

ICT tools can be used for better understanding.

Encouraging students to participate in technical events.

Lab periods are in to morning it can be in afternoon because morning everyone would be active and it is better to

have theory classes.

There should be regular examinations that assess the teacher's knowledge updation

To teach as clear as possible

Smart class

Moderate

They want to improve a teaching slightly

Please give OD to attend workshop, seminars etc...

No idea

Provide smart class

Core life skills has to be enhanced

Instead of exams written, students could be given practical assignments to do that doesn't involve knowledge

alone, but enhance their verbal, reasoning and logical ability

Have to take more care about the students

Provide smart class for difficult topics to learn

Teach more practical & practice. Try to make us to understand all logics.

please make us as a perfect engineers.

Must improve teaching method

We need PowerPoint presentations to understand deeply

every thing is perfect

More focus on extra curricular

We need more English knowledge via teaching

Use technology to see others in action ,Build positive relationships,

Teachers can take class interactively

improve the infrastructure,

no more quarries ,simply ok.....

simply good

Good

Nothing

Test

PPD

Every teachers should be prepared well for class.

Every teachers should encourage our extra curricular activities

Nil

Very Effective And good teaching staffs

More practical session can be given

Internship can be provided

1.Using LCD projectors etc for better understanding.

To give some practical examples related to the concept for easy remembrance.

To give some ideas about the practical applications of the concept and it's importance in day to day life.

Experimental learning

Practical examples

Visual learning

ppt classes are needed

put full internals for toppers who scores well in semester and dont put by just seeing unit test performance

Don't prepare them for exam prepare them for future with more creative ideas not like same what is still going on.

Facility must give Proper books for all subject

Teachers could give notes to study.

*Fees can be reasonably charged

*Should arrange for more industrial visit

I feel it would be better if teachers use ICT tools to teach

Teaching can be more application oriented

1.Still don't know the purpose of retest in unit exams,instead of having retest u can have assessment

2.very less interaction between teacher and student.If student fails in any subject that doesn't mean his

weakness, on that day he might have been poor health or the circumstances may be different.

Anna University itself must change their exam scheduling based on single test. They must give a certain amount

of time like how company's conduct exam via online..the exam should be open portal..

Thank you

very much satisfied

they must give sometime to relax

good

satisfactory performance

give extra examples, to concentrate more topics apart from subjects

must allow phones inside campus

give freedom

syllabus should be updated

1. can be more elaborate

2. give less homeworks

3. avoid coaching classes

use smartboard

satisfactory

to give freedom and allow mobiles for learning

*practical application of the concept should be thought perfectly

*imposition should not be given because it makes us to hate the particular subject

*home work shouldn't be given because there is no time to do sub courses/internship/skill rack etc

good

super teaching

environment is too good

smart class for every class

allow mobile phones, cause we can't be able to communicate even in any emergency

teachers should know the student ability in which they are interested

teachers should give equal importance to all the fields

institute allow students to play for atleast half an hour so that only they are studied without pressure

allow phones

1.phones or study tabs must be allowed to be inup to date like skill improvement.

2.conduct retests during collage working hours.

Environment is too good.

I suggest that continuous usage of practical application in every study to enhance the thing they grasp.

Please promote the extracurricular activites over studies if they are good at that.

1)i think that the teachers should teach the students with more class and live examples

2)we would like the teacher to teach us more things out of the box

3)finally i would say that all the teacher are good

needed ict tools while teaching

every faculties want to encourage in eca

need more to know apart from studies

good

phone must be allowed

good

1)i think that the teachers should teach the students with more class and live examples

2)we would like the teacher to teach us more things out of the box

they can encourage more.....can give more importance to extra curricular activies other than studies

should give more importance to week students

NOTHING

need mobile phones to copeup studies

1.avoid retests

2.avoid coaching classes

3.can be lenient in classes

allowing mobile phones helps us to learn something

syllabus should be updated and made more lively

satisfactory

*mobile phones should be allowed inside the campus

*

very bad

NOTHING

good

good

1.good well

2.environment is to good

3.good teaching

excellent

mobile phone must be allowed inside the campus

must allow phones

give freedom

1.Can teach practically with some examples.

2.Teachers may interact with the students.

3.Can give some break in between the class time.

1)i think that the teachers should teach the students with more class and live examples

2)we would like the teacher to teach us more things out of the box

need mobile phones to study

1.avoid coaching classes

2.avoid retests

3.should be lenient

allow mobiles to learn something

allow laptops inside the campus

dont make strict rules

teaching to be made more interesting

teachers allowed student in which they are intresting

Give more practical and live teachings

Allow interactive sessions which are not gender biased

Allow internet access by allowing mobile phones or tabs or any other form of gadgets in order to develop our

inter personal skills

WE FEEL BIASED AS 1 YEARS CAN BRING TAB TO COLLEGE IT IS NOT FAIR PLEASE TAKE

NECESSARY MEASURES

give more examples

no suggestions

better

no need of coaching class or retest we will improve without retest and coaching class.....they can give more

opportunities over extra curricular activities

very poor canteen supplies need to improve a lot!

allow mobile phones cause this college is located in forest not in city! if any emergency we need to communicate

our parents

required mobiles

teachers allowed student in which they are intresting

use smartboards

I suggest the usage of electronic devices in the college at particular intervals.

College should promote extra activites and industrial idea.

The use of smart devices in college will help enhance the people encourage of new thoughts.

1.good well

2.good teaching

environment is ton good

allow mobile phones

1)i think that the teachers should teach the students with more class and live examples

2)we would like the teacher to teach us more things out of the box

1.be lenient

2.can be more focused

3.avoid retests

allow phones

smart phones must be allowed

vera level

allow laptops ,phones etc

teaching to be made more lively

teachers allowed student in which they are intresting

WORST WORST WORST

WONT CHANGE EVEN IF WE GIVE FEEDBACK

THEN WHY SHOULD I WASTE MY TIME?

very poor teaching,need to improve a lot, allow boys and girls to talk

needed coaching class at last 2 periods

conducting retest is just wasting time because students are not sincior in that

wants to know about manythings apart from subject

please allow mobiles

use techology

1)It would be more effective when projectors etc.,are used to teach.

2)Break timings can be extended.

3)Conducting extracurricular activities frequently so that students feel refreshed and concentrate in subjects.

Good perfomance

Promote the usage of smart phones.

Staff should encourage new ideas.

no need of coaching class

no need of coaching class or retest plzzzz

1.good well

2.teaching is too good

avoid coaching class

avoid retest

allowed phone lap top materials

disssmiss ilamurugan sir and sridevi (hoD) and balaji s&H hod

.

examples

i observed that the teaching well

I suggest to plant tree more to improve environment good

I ob

.

needed coaching class at last 2 periods

conducting retest is just wasting time because students are not sincior in that

wants to know about manythings apart from subject

1.Can teach with some more examples.

2.Teacher may interact with students.

3.Can give some break in between the class hours.

very poor infrastructure lack of maintanance and boring institution

can increase the extra curriculum activities

should use lcd projectors for teaching

Teachers should use multimedia tools for teaching to improve learning experience

stop evening classes ,allow mobile phones,

Good

It is already better nothing to improve

Nothing

Need to use smart class,projector

Make the session interactive

To teach with examples in our day to day life . How this will be useful

satisfied

Lab sessions are good

satisfies

Good

Good

Good

Good

good

Good

GOOD ,INTERACTIVE

Good

Good

Good

GOOD,

Good

Good

NEED MORE INTERACTION

very good

NEED MORE PRACTICAL SESSION

good

NEED MORE VIDEO CLASSES

excellent

good

SATISFACTION

SATISFY

GOOD

good

good

good

good

More activities, examples to explain concepts, organising field trips, workshops, seminars

To mold students as engineer not as graduate.

2.Practical way of teaching.

Encourage students to learn based on job requirements.

sairam

USING DIGITAL METHODS FOR TEACHING WILL BE USEFUL AND ALLOWING GADGETS INSIDE

THE INSTITUTION

Good

Actually they are good in monitoring students instead the management can also evaluate teachers once in a while.

Cannot blame all the faculty but there are some, one or two who literally don't deserve to be a lecturer . And

moreover complaints from students are ignored by the management . And that should have some change .overall ,

students of ug degree will have a better learning experience than pg students .

good

tablets can be allowed in the clg campus for study purpose.

mobile tablets can be allowed in college campus for educational purpose.

good

the teaching level is already in high

Teaching well

Teaching mostly in the theoretical basis.. We need some practical approach... To learn and understand in easier way

They have to clearly define what they are trying to say. A mam in my class was running so fast on the syllabus so

it's been hard to catch what she is exactly delivering other than this everything quite good.

It got a good learning experience from my institution .

My faculty members are the best in teaching and they are easy approachable.

Good

Can teach using real-time projects and world

Try to identify students skills and then encourage... Give an importance to sports Or extracurricular activities not

only to studies..... Identify the inner potential of the students

Sairam is the best place for students

The institution is doing well. The learning experience helps to develop my skills in all required aspects.

Every thing is fine

We need some examples of concept

No suggestions

teachers can teach students with LED projector with multimedia etc...

Very well, nice

No improvement

Good

No Improvement required

Improvement required

Overall teaching is good

NA

Good

No suggestions

Moderate level in inculcating the ideas that teacher like to share.

In depth knowledge of subject is not acquired by the students.

Teaching is completely based on marks, not the knowledge.

Also good

Everything is perfect

Allow us to present a seminar in the class

need individual concentration

easy to communicate with the staffs.

students are easily able to gain additional knowledge.

easy to learn and gain more knowledge

easy to gain knowledge and improve our ability

want to teach application oriented.

needed practical exposure towards our department oriented subjects

want more interactive class sessions.

want more additional cooperation with students.

needed more live video session regarding our subjects

want more practice questions towards university examinations.

Needed more examples and applications regarding suitable subjects.

want to be patience of student activities.

need video classes

Attendance may be relaxed

need laptop access

.....

.....

it already better

slow and steady wins the race

1.Detailed and Practical explanation

2.Clear way of explanation

3.should also include advanced concepts

ICT tools can be used

Interactive sessions and student oriented programs can be conducted

Use of technological gadgets can be permitted inside the campus

update the technology in college

experimental class should be given to all the subjects

good skills

good class

good teachers

Call taxi fare is Rs.100 for the first $1/5$ km and Rs. 20 for each $1/5$ km thereafter. The call taxi fare for a 4 km

ride is

they did not allow phone to bring

it already better

Nothing to say!!!keep rocking and keep more interactive sessions to develop personal skills

i expect better teaching

teachers can explain the concept with example

excellent service

best teaching experience

hope this continues till my final year

thank you

Teaching is very good

teachers can give more example for basics

Nil

super,rockking,cool

maintain the same

i except better teaching

to be intrective,tobe applicable

to reduce the strict

to be interactive

want to be patience of student activities.

needed to give practical sessions

needed to give additional department oriented knowledge.

want to improve the practical knowledge

want to develop the infrastructure of the class

needs to improve the additional technical knowledge

needed more industrial visit to gain company knowledge

needed more practical sessions

needed more video session classes

wanted more video class sessions

need to improve the infrastructure of the classes

want to be more patience

needed more practical class sessions

need to be more interactive sessions

need more seminar sessions

need more mechanical oriented video sessons

Need more seminar classes to improve communication.

need more interactive sessions.

want more seminar classes.

needed more interactive motivational sessions.

want to motivate students

needed more video sessions regarding our department.

needs to be more motivation to students.

needed more seminar sessions.

By teaching with more as practical to gain our practical knowledge..

Critical problem solve

Good

good

good

very good
